**EN - Booster cushion, with backrest**

General .....	4
Installation .....	6

## General

### Child restraint usage

Children must always use a child restraint suitable for their age and size when traveling by car. Start using the booster cushion with backrest when the child is too big for the child seat.

Only use the booster cushion with and without backrest for children weighing between 33 and 80 lbs (15 and 36 kg) and between 38 and 54 inches (97 and 137 cm) tall.

The backrest is an advantage for smaller children as it provides better support for a sleeping child and must always be used if the car does not have headrests.

Volvo recommends that the backrest is always used with the booster cushion. The booster cushion can be used until the child reaches a height where a regular seat belt can be used without the booster cushion.

### After a collision

During a collision, the booster cushion, backrest and seat belt are subjected to high stresses and must therefore be replaced.

#### Warning!

This restraint is not certified for aircraft use.

#### Warning!

Do not make any modifications or additions to the booster cushion, backrest or its mounting without written permission from the relevant authority. Use only the vehicle's lap and shoulder belt system when restraining the child in this booster cushion with backrest. Failure to follow any of the instructions can result in your child striking the vehicle's interior during a sudden stop or crash.

The booster cushion with backrest must be used only with the original cover. Never leave the booster cushion and backrest loose in the passenger car. Secure them with the seat belt even when not in use.

#### Note!

The safest location for a child is to sit properly restrained in the rear seating positions.

Never position the booster cushion on the front passenger seat if the vehicle is equipped with an airbag (SRS) on the passenger side.

### Washing instructions

The booster cushion and backrest wool covers are removable and can be machine washed with mild detergent at max. 86 °F (30 °C) on a wool cycle. Spin on a gentle cycle. Do not tumble dry and do not use products containing chlorine. Gently stretch out the cover after washing and let it dry flat.

Covers with leather do not need to be removed for cleaning and must not be machine washed. Use Volvo's leather cleaner on the leather and textile care product on the other cover materials.

### General

#### Registration information

Child restraints could be recalled for safety reasons. You must register this restraint to be reached in a recall. Send your name, address, the child restraint's model number and manufacturing date to:

Customer Service

Volvo Car USA, LLC 1 Volvo Dr, P.O. box  
914 Rockleigh , NJ 07647-9981

or call 800-458-1552.

or register online at

<http://volvo.custhelp.com/app/registration>

For recall information, call the US  
Government's Vehicle Safety Hotline at  
1-888-327-4236.

(TTY: 1-800-424-9153), or go to:

<http://www.NHTSA.gov>.

## Installation

### Backrest

1.

- Place the backrest adjustment bar (1) in the cushion's tension mounting yoke (2).

2.

- Turn the backrest so that the upper crossmember of the adjustment bar engages into the upper part of the tension mounting yoke.

3.

The backrest has two positions:

- Upright, with the backrest resting completely against the rear seat backrest.
- Sleeping position, where only the upper part of the backrest's headrest rests against the rear seat backrest.

#### Note!

This booster cushion with backrest can only be used in passenger cars with approved continuous-loop lap and shoulder belts. The booster cushion with backrest can be used in all seating positions in the rear seat.

After installation, check that the booster cushion and the belt are not trapped or damaged by folding seats, doors, etc.

## Booster cushion, with backrest

en-US

### Installation

4.

- Raise or lower the backrest by pressing the button (1) on the back of the backrest. There are five fixed positions.

#### Note!

If you are unsure where to position the booster cushion, see the vehicle's Owner's Manual or contact Customer Service Volvo Cars USA.

### Booster cushion

5.

- Place the booster cushion on a seat with approved continuous-loop lap and shoulder belt.

- Place the booster cushion on a seat with approved continuous-loop lap and shoulder belt.

**Installation**

6.

- Position the child and tighten the lap belt's fixed end under the corner of the booster cushion.

7.

- Place the lap belt's loose end under the corner. For larger children, pull the shoulder belt across the corner. For smaller children, pull the shoulder belt under the corner.

8.

- Fasten the belt buckle and pull the seat belt in the direction of the arrow.

## Booster cushion, with backrest en-US

### Installation

9.

- Ensure that the seat belt is in contact with the child's body and does not twist or slacken.

10.

- Check that the belt is positioned correctly across the shoulder and the lap belt is positioned low for optimum protection.

11.

- The seat belt must not touch the child's neck or lie below the shoulder.

**Installation****12.**

- If the shoulder belt touches the neck, then place both the lap and the shoulder belt under the corner. Then go back to point (7). If the shoulder belt is below the shoulder even though it is located across the corner, the child has outgrown the child restraint.

**13.**

- When the backrest is used, the shoulder belt must run freely under the backrest corner.
