Volvo Car Corporation Gothenburg, Sweden

INTRODUCTION

Read through all of the instructions before starting installation.

Notifications and warning texts are for your safety and to minimise the risk of something breaking during installation.

Ensure that all tools stated in the instructions are available before starting installation.

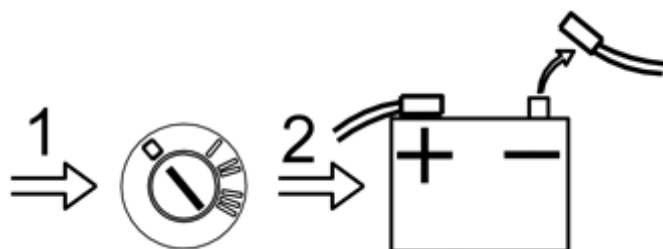

Certain steps in the instructions are only presented in the form of images. Explanatory text is also given for more complicated steps.

In the event of any problems with the instructions or the accessory, contact your local Volvo dealer.

Note!

This accessory is connected to the electrical system of the car. It requires software unique to the car.

1

A8800136

Applies to cars with automatic gearboxes

Turn the ignition key to position 0.

Note!

Wait at least five minutes before disconnecting the connectors or removing other electrical equipment.

Disconnect the battery negative lead.

Applies to cars with manual gearboxes

Turn the ignition key to position 0. Remove the ignition key from the ignition switch.

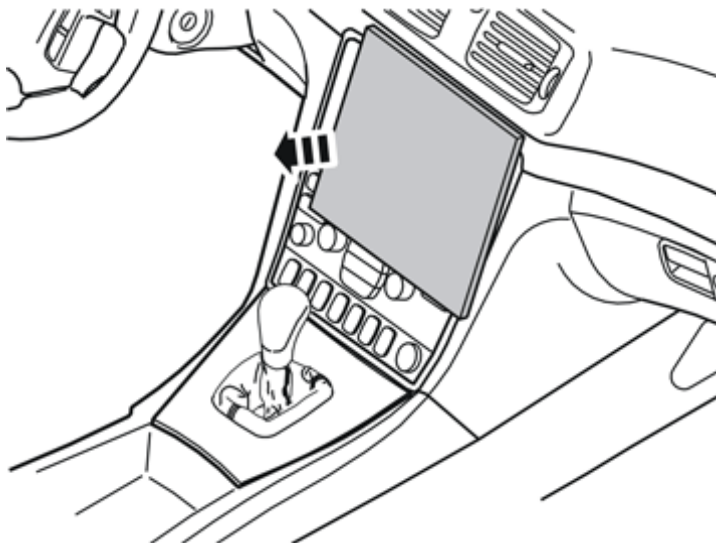

Note!

Wait at least five minutes before disconnecting the connectors or removing other electrical equipment.

2

M8504991

Remove the polystyrene block from the centre console. It will not be reused.

3

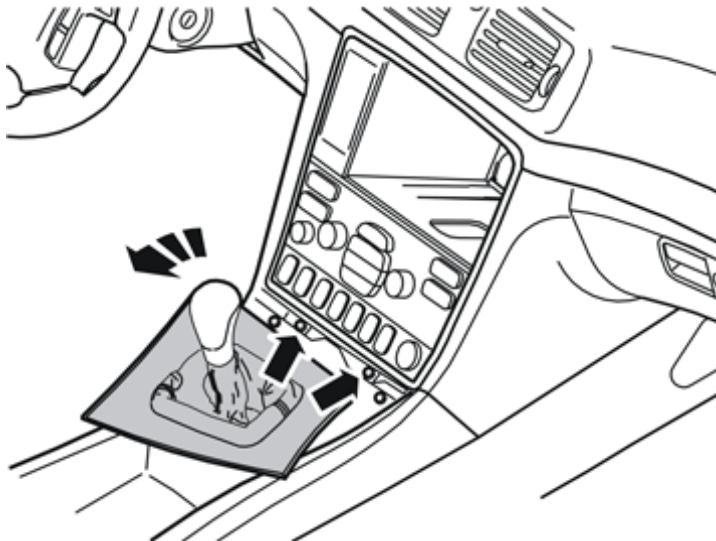

M8504992

Detach the rear edge of the gear selector lever cover together with the boot until the two clips release. Use a plastic weatherstrip tool. Remove the gear selector lever cover and the boot. Pull the panel up until the four clips at the sides release.

4

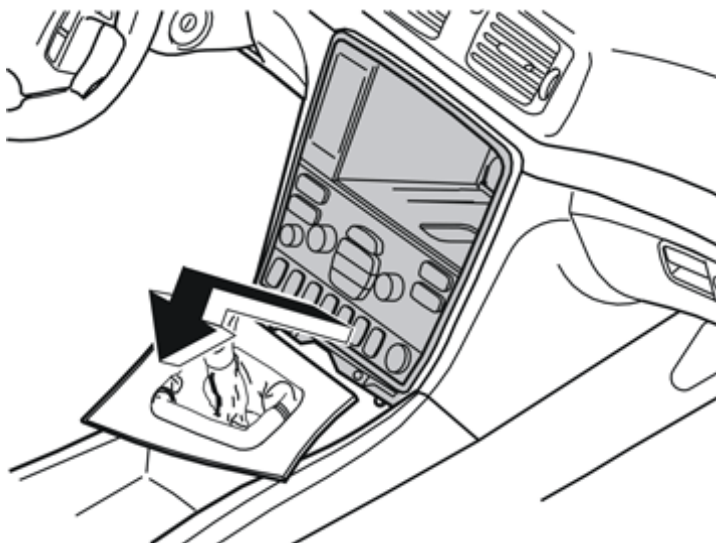

M8504993

Apply the handbrake. Move the gear selector backwards

Turn the panel to the left to facilitate access

Remove the two screws holding the bracket with the radio and the dashboard environment panel in the centre console.

5

M8504994

Remove the bracket with dashboard environment panel from the centre console: Pull the lower edge out and downwards until it releases from the mounting at the upper edge. Then fold backwards.

Note!

Do not damage the removed components and surrounding panels.

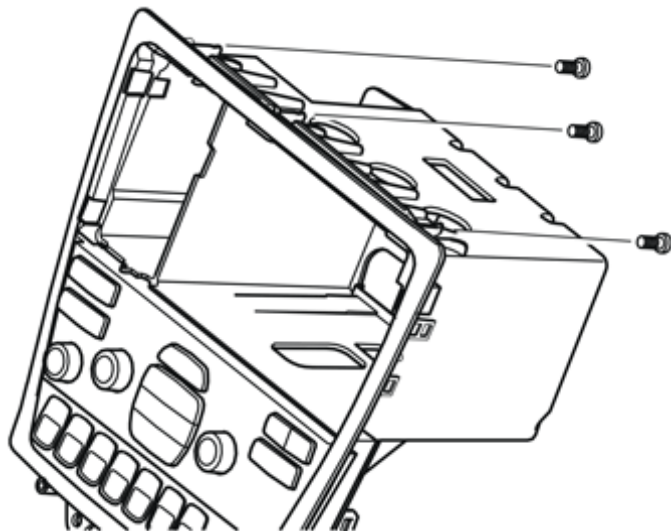

If necessary, remove the panel around the gear selector lever to gain more space. The panel is secured by four catches on the lower side at the boot.

Remove the connectors from the dashboard environment panel. Disconnect the connector for the phone if installed.

6

M3905098

Remove the three screws in the upper edge of the trim for the unit and radio and dashboard environment panel.

7

M3905105

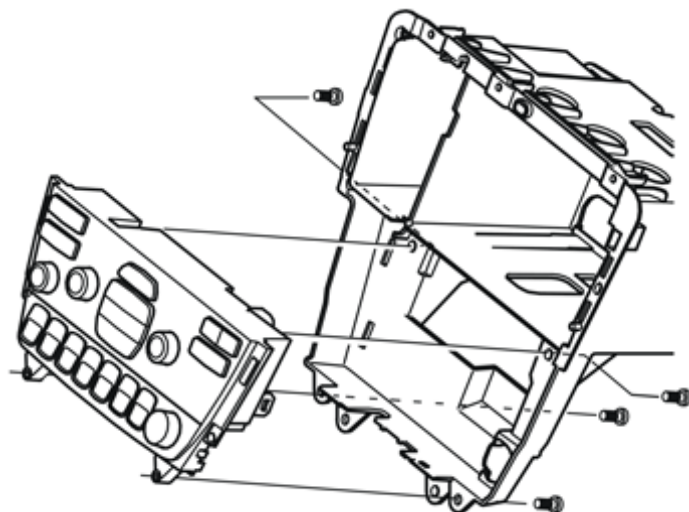

Remove the trim from the unit. Pry off the catches along the vertical and lower sides of the trim. Pull off the trim. Do not damage the catches. The catches are thin and easily broken

Remove the three pieces of foam tape from the centre console. They will not be reused.
